

# Crimson California Pipeline L.P.

## Carrier Cross System Physical Transfer Policy (August, 2008)

If business conditions develop whereby excess physical Barrels owned by Carrier are not readily marketable in a specific pipeline System operated by Carrier, Carrier reserves the right to exchange for Barrels in another pipeline System operated by Carrier. Said exchange will compensate the effected Shipper(s) for gravity differential on an adjusted physical Barrel volume basis.

All other terms and conditions as described in the Rules and Regulations Tariff, Cal. P.U.C. No. 27, shall apply.
